Issued 07/03/2010

FOR PERIOD 18:00HRS Sun 07/03/2010 TO 18:00HRS Mon 08/03/2010

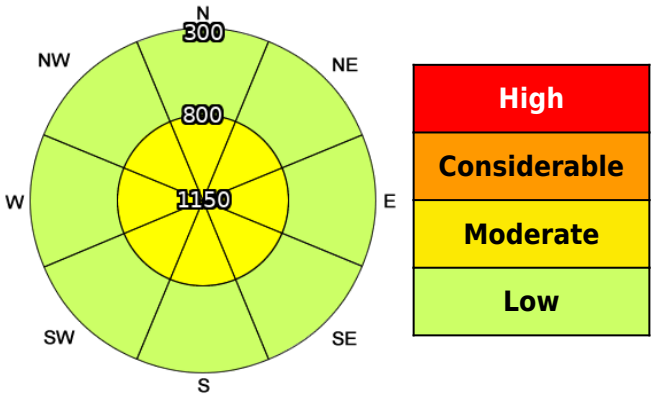

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Monday 08/03/2010

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

With colder settled conditions snowpack stability will continue to improve in many areas. Areas of moderately bonded soft slab will remain mainly in deeper sheltered gullies, hollows and around corniced areas above 800 metres Rising daytime temperatures may also develop weaknesses in deep older windslab on steep Southerly and Westerly aspects. The avalanche hazard will be Moderate.

Forecast Weather Influences

Dry conditions will continue with light variable winds, the freezing level will lower to 650 metres.

Comments

Settled conditions for next few days expected. Cornices will be prone to collapse with rising daytime temperatures,
