Glencoe

Avalanche Hazard Forecast

Issued 09/03/2010

FOR PERIOD 18:00HRS Tue 09/03/2010 TO 18:00HRS Wed 10/03/2010

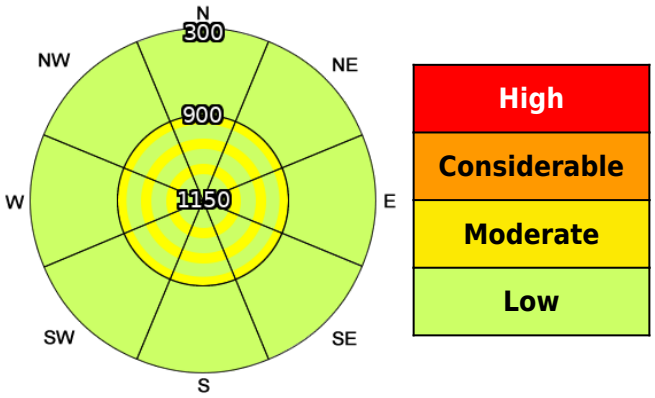

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Wednesday 10/03/2010

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The general snowpack stability will be good but localised surface instabilities will exist in the most sheltered gullies, on steep scarp slopes and around corniced areas. The avalanche hazard will be Moderate. Hazard of rock and icefall will exist where slopes are affected by rising daytime temperatures.

Forecast Weather Influences

An anticyclone will maintain the dry and settled conditions. Winds will be light to moderate variable and the freezing level will be around 750 metres.

Comments

Another perfect day here in the West Highlands. Outlook for Wednesday looking good. Cornices will be prone to collapse with rising daytime temperatures.
