

**THE AVALANCHE HAZARD WILL BE CONSIDERABLE****Avalanche Hazard Forecast for Sunday 14/03/2010****Avalanche Problems****Forecast Snow Stability & Avalanche Hazard**

Small pockets of weakly bonded slab will develop on East to South aspects above 900 metres where avalanches are likely. Cornices will be weaker. The avalanche hazard will be Considerable.

**Forecast Weather Influences**

The North-westerly airflow will continue with freezing levels staying quite high and showers becoming more persistent on Sunday. Snow will be at only the highest elevations.

**Comments**

Deeper and mid-pack is still good stability, although some of the lingering weaknesses persist.
