Glencoe

Avalanche Hazard Forecast

Issued 14/03/2010

FOR PERIOD 18:00HRS Sun 14/03/2010 TO 18:00HRS Mon 15/03/2010

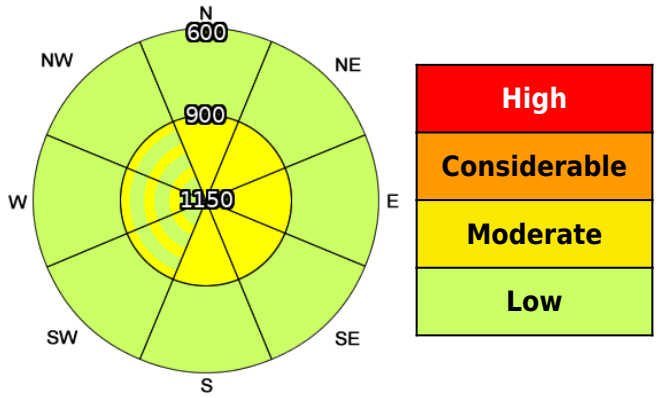

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Monday 15/03/2010

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

New areas of poorly bonded windslab will develop in sheltered locations. Deepest accumulations will mainly be on North through East to South-East aspects above 900 metres. These deposits are not expected to be extensive but steep slopes, gully exits, scarp slopes and corniced locations will be mostly effected. Some wet snow instabilities will also be present. The avalanche hazard will be Moderate.

Forecast Weather Influences

There will be snow showers overnight above 900 metres with strong Westerly winds. During the day winds will ease and become North-Westerly with isolated precipitation. The freezing level will rise to around 1000 metres.

Comments

Drier and more settled conditions for a while from mid morning on Monday. Colder on Tuesday.
