Glencoe

Avalanche Hazard Forecast

Issued 26/03/2010

FOR PERIOD 18:00HRS Fri 26/03/2010 TO 18:00HRS Sat 27/03/2010

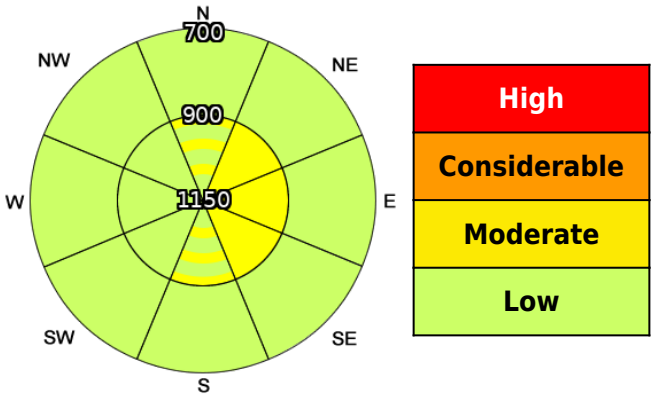

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Saturday 27/03/2010

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The existing snowpack will re-freeze in the colder conditions. Fresh areas of windslab will be deposited on North-East to South-East aspects above 900 metres. These areas are not expected to be extensive, and will generally be avoidable. The avalanche hazard will be Moderate.

Forecast Weather Influences

The freezing level will be about 1000 metres overnight, dropping to 800 metres during the day. Showers will fall as snow above about 700 metres. Strong winds will be from the West.

Comments

The existing snowpack will turn very hard and icy with the re-freeze.
