Glencoe

Avalanche Hazard Forecast

Issued 28/03/2010

FOR PERIOD 18:00HRS Sun 28/03/2010 TO 18:00HRS Mon 29/03/2010

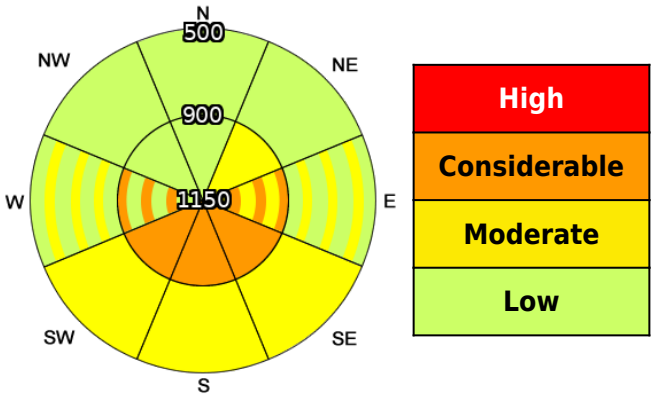

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Monday 29/03/2010

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Areas of unstable windslab will be deposited on South-East to South-West aspects above 900 metres. Patches of slab are possible in sheltered locations on other aspects. In locations exposed to the wind, the snowpack will be scoured, and stability will generally be good. The avalanche hazard will be Considerable.

Forecast Weather Influences

Snow showers will continue overnight and through the day. Moderate Northerly winds will veer to the North-East. It will be colder than of late with a freezing level of around 350 metres.

Comments

With colder temperatures on Monday, and snow later in the week winter looks like making a return for the Easter period.
