Glencoe

Avalanche Hazard Forecast

Issued 31/03/2010

FOR PERIOD 18:00HRS Wed 31/03/2010 TO 18:00HRS Thu 01/04/2010

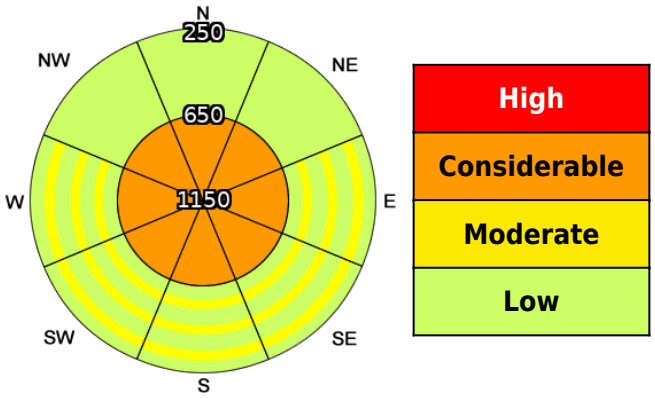

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Thursday 01/04/2010

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Above 650 metres mainly on South-East through South to West aspects areas of weakly bonded soft windslab will be present, these deposits will be deep in places and unstable , here avalanches are likely. Other sheltered aspects will have localised pocket of unstable snow due to cross loading. The avalanche hazard will be Considerable.

Forecast Weather Influences

Overnight some light snow showers, becoming mainly dry during the day. The very strong North-Westerly winds will continue to cause severe drifting.

Comments

Still windy on Thursday, summit temperatures around -3c. Conditions look more favorable for Friday with some sunshine.
