Issued 02/04/2010

Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Fri 02/04/2010 TO 18:00HRS Sat 03/04/2010

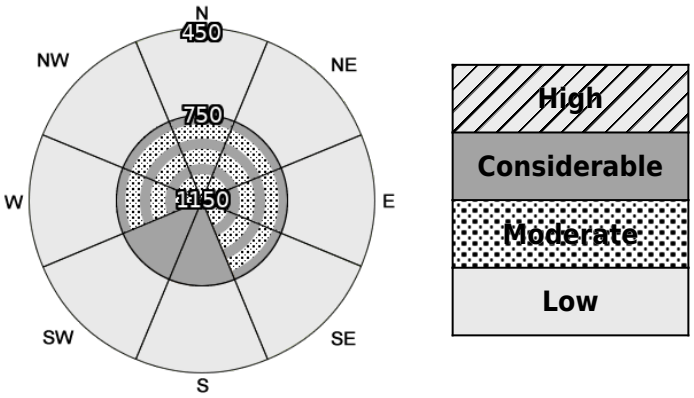

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Saturday 03/04/2010

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

New accumulations of weakly bonded windslab will start to form as snow showers start in the early afternoon. The greatest deposits will be above 850 metres in sheltered locations and mainly on South to South-West aspects. Other sheltered areas will have localised unstable deposits due to cross loading. The avalanche hazard will be Considerable. Cornices will remain unstable.

Forecast Weather Influences

It should remain dry until around mid-day then snow showers above 450 metres. The winds will be moderate and North-Easterly. Freezing level 700 metres.

Comments

After some snow showers on Saturday afternoon Sunday looks like being a fine,dry and bright Easter day.
