

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Tuesday 21/12/2010

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The overnight snow showers will deposit fresh areas of poorly bonded windslab on East to South aspects above 900 metres. These are not expected to be extensive. Isolated instabilities will remain in the older windslab in sheltered locations on most aspects. The avalanche hazard will be Considerable.

Forecast Weather Influences

After some overnight snow showers, a dry day is expected. Temperatures will remain below freezing at all levels. Light North-Westerly winds will veer to the North.

Comments

Cold conditions expected to continue.
