

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Thursday 23/12/2010

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

On many steep aspects, localised areas of unstable snow will be present. The cold temperatures will continue to weaken the underlying snow structure. In many other locations a thin layer of unconsolidated snow will overlie a frozen crust. In these locations the snowpack will generally stable. The avalanche hazard will be Considerable.

Forecast Weather Influences

The cold and dry conditions will continue with very light winds

Comments

Instabilities developing in areas of shallow snowpack due to the cold temperatures
