

THE AVALANCHE HAZARD WILL BE CONSIDERABLE**Avalanche Hazard Forecast for Friday 24/12/2010****Avalanche Problems****Forecast Snow Stability & Avalanche Hazard**

Current lying snow and new additional snow deposits will be transported to lee areas and form weakly bonded wind slab on mainly South-East to South-West aspects above 750 metres. The avalanche hazard will be Considerable.

**Forecast Weather Influences**

Occasional light snow is forecast with slightly stronger Northerly winds. Temperatures will remain cold.

Comments

Exit slopes on some Corrie Kander routes look fat with convex terrain snowpack as well. Extra route finding care required there.
