

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Friday 07/01/2011

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Deposits of weakly-stabilised snow will persist on steep North through East to South-East aspects above 800m. Deepest deposits will lie at the top of corrie backwalls and gully heads. All cornices will remain weak and prone to collapse. The avalanche hazard will be Considerable.

Forecast Weather Influences

Remaining cold and largely dry with moderating West, later South-West winds.

Comments

Avalanche involving 2 climbers reported in Coire Ardair late on Weds, location unconfirmed. Last Post proving popular. Climbers observed making slow progress in Centre Post on Thursday.
