

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Sunday 09/01/2011

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

New accumulations of windslab will develop on East to South aspects above 800 metres. Some patches will be possible on other aspects due to cross loading. Older instabilities will remain on North and North-East aspects. Fresh cornices will be prone to collapse. The avalanche hazard will be Considerable.

Forecast Weather Influences

Overnight snow showers will continue through the day. These will fall in moderate North-Westerly winds. Temperatures will remain below freezing at all levels.

Comments

Low temperatures and a bitter wind made it feel very cold on the summits today. Similar conditions expected for Sunday.
