

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Saturday 15/01/2011

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snowpack will remain reasonably well stabilised until sleety snow turns to heavy rain during the day. Localised wet snow instabilities are expected mainly, but not exclusively, on North to East aspects above 900 metres. All cornices will become unstable and prone to sudden collapse in sustained wet, mild conditions. The avalanche hazard will be Considerable.

Forecast Weather Influences

Cooler for a time overnight with sleety snowfall turning quickly to persistent heavy rainfall at all levels.

Comments

Horrible mountain conditions in prospect for Saturday.
