

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Thursday 20/01/2011

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snow pack has consolidated at all levels and localised pockets of wind slab above 700 metres on North-East through East to Southerly aspects will continue to stabilise. The avalanche hazard will be Low.

Forecast Weather Influences

High pressure is developing and it will remain dry into the weekend. Winds will be light and Westerly with no precipitation. Freezing level will be around 800 metres.

Comments

Good ski-touring and walking conditions, although there are icy patches. The piste skiing here is very good.
