

## THE AVALANCHE HAZARD WILL BE CONSIDERABLE

### Avalanche Hazard Forecast for Friday 21/01/2011

#### Avalanche Problems

#### Forecast Snow Stability & Avalanche Hazard

Stability will remain good in many locations. Localised pockets of less-well stabilised snow will persist on North-East through East to South-East aspects above 950m. A little new marginally stabilised windslab is possible on in these locations in the event of stronger winds. The avalanche hazard will be Considerable.

#### Forecast Weather Influences

It will remain dry with light to moderate North-West winds and freezing levels fluctuating around summits.

#### Comments

Loads of photos on our blog - check later this evening
