

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Saturday 22/01/2011

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Small pockets of weakly bonded wind slab will develop in sheltered locations, mainly on East to South aspects above 800 metres. The avalanche hazard will be Moderate

Forecast Weather Influences

There will be a trace of snow overnight with moderate North-Westerly winds, backing North-North-Westerly. Freezing level will be around the summits with colder air in the glens.

Comments

Some cornice development and some steep exit walls at tops of routes. Be aware of very icy terrain even at low angles.
