

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Thursday 03/02/2011

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Very poor stability on all North-West through North to South-East aspects above 750m where avalanches are likely. Good stability on all slopes directly exposed to the wind. The avalanche hazard will be Considerable

Forecast Weather Influences

Colder with overnight snow showers returning late in the day when they will be heavy. Winds will be storm force Westerly, later South-South-Westerly.

Comments

Atrocious weather on Weds. Very stormy on Thurs with 3 figure wind speeds possible over summits. A lull during the day then heavy late snow showers. Early finish advised, or just stay at home.
