

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Thursday 17/02/2011

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Stability will remain marginal to poor on steep North-West through North to North East aspects above 900m. Continued consolidation expected at lower altitudes. Strengthening winds may result in some new, thin weakly bonded drifted snow accumulating on steep ground of the above aspects. All recent cornices will remain fragile. The avalanche hazard will be Considerable.

Forecast Weather Influences

A few light snow showers overnight followed by a dry day. Winds will be light South Easterly increasing to moderate later.

Comments

Poor visibility up high on Weds. Thursday looking brighter.
