

THE AVALANCHE HAZARD WILL BE HIGH

Avalanche Hazard Forecast for Saturday 19/02/2011

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Avalanches will occur on West to North-West through North to North-East aspects above 750 metres due to extreme storm conditions, heavy snow and very strong winds. The avalanche hazard will be High

Forecast Weather Influences

Storm snow conditions are forecast with lowering freezing level and extremely strong winds from the South and South-East.

Comments

Looks like a storm cycle to wait things out away from avalanche terrain on the locations noted.
