

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Saturday 26/02/2011

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The existing snowpack will stabilise as temperatures drop. There will be a build up of marginally stabilised windslab on steep North-East through East to South aspects above 850 metres. The avalanche hazard will be Considerable.

Forecast Weather Influences

Colder weather accompanied by snow showers will affect the area. The winds will veer from SW to NW and reduce in strength.

Comments

Stability will be much improved as the freezing level drops during the night before the onset of snow showers.
