

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Thursday 03/03/2011

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Overall little change is expected. The snowpack will soften and moisten slightly overnight, but will then firm up through the day in the slightly cooler temperatures. Stability will generally be good. The avalanche hazard will be Low.

Forecast Weather Influences

After some very light rain during the night, a dry day is expected. Winds will be light and the freezing level will drop to around 1050 metres.

Comments

Snow cover firming up, ice axe and crampons recommended.
