

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Sunday 06/03/2011

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snowpack will firm up in the slightly cooler conditions. It will remain hard and icy in shady locations, and begin to soften in areas exposed to any sunshine. Stability will be generally good on all aspects and altitudes. The avalanche hazard will be Low.

Forecast Weather Influences

It will remain dry and settled through the forecast period. The freezing level will fall to around 900 metres with light to moderate South-Westerly winds.

Comments

Ice axe and crampons useful in locations where the snowpack has not softened in the sunshine.
