

THE AVALANCHE HAZARD WILL BE MODERATE**Avalanche Hazard Forecast for Saturday 19/03/2011****Avalanche Problems****Forecast Snow Stability & Avalanche Hazard**

Sun effect on Southerly aspects may contribute to loose snow avalanche activity. Cornices will become weaker. On most aspects and altitudes the deeper snowpack will generally be stable except for isolated areas at the highest elevations on steep, convex terrain. The avalanche hazard will be Moderate.

**Forecast Weather Influences**

A dry day is forecast with light to moderate South-West winds backing Southerly. The freezing level will be about 900 metres.

Comments

Very skiable from high powder, breakable crust, corn, and heathery mush to the parking lot.
