

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Monday 21/03/2011

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Very warm temperatures will maintain instability on all steep North through East to South-East aspects above 800m. Cornices overhanging these locations will continue to weaken and threaten slopes below with high potential loading. Pockets of instability will also be present on many other aspects. The avalanche hazard will be Considerable.

Forecast Weather Influences

Dry and warm with the freezing level rising to 3000m during the day.

Comments

Maximum summit temperatures projected to be 11 degrees C. That is warm. All corniced locations best given a wide berth for the time being.
