

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Saturday 26/03/2011

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The surface layers of the old snowpack will refreeze at all altitudes. Stability will be good in most locations but pockets of soft, thin marginally stabilised windslab may accumulate on steep South through West to North aspects above 900m. The avalanche hazard will be Moderate.

Forecast Weather Influences

Colder with some light snow showers. Winds will be light to moderate North-Easterly, later South-Easterly.

Comments

Uncertainty over forecasted snow amounts – check weather updates.
