

## THE AVALANCHE HAZARD WILL BE LOW

### Avalanche Hazard Forecast for Thursday 31/03/2011

#### Avalanche Problems

#### Forecast Snow Stability & Avalanche Hazard

Generally the snowpack although soft will be stable at all altitudes and on all aspects, although the snow pack will become moist in the rain and as the thaw continues generally stability will be good. Any remaining cornices will be prone to collapse. The avalanche hazard will be Low.

#### Forecast Weather Influences

It will be a dry night with high amounts of rain expected around dawn. The wind will back from South to West becoming strong.

#### Comments

The rain will continue to be an influence on deeper instabilities on steep slopes. There are good spring travel conditions at high levels but breaking through the surface at lower levels.
