

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 02/04/2011

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The negligible amounts of snow forecast will bond reasonably well to the old snow surface in the slowly and briefly cooling temperatures. The deeper snowpack will remain well bonded. The avalanche hazard will be Low

Forecast Weather Influences

There will be heavy rain with strong Southerly winds veering South-West. There will be a brief drop in the freezing level with light snow amounts above 600 metres.

Comments

The slight brief cooling forecast will tighten up surface for a short time.
