

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Friday 08/04/2011

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snowpack will remain generally well bonded and stable in most locations. Remaining cornices will be prone to collapse. The avalanche hazard will be Low.

Forecast Weather Influences

It will be dry and mild with strong decreasing to moderate West veering North-West winds. The freezing level will be well above the summits.

Comments

Rock fall and cornice collapse a potential hazard particularly as its looking so mild, also there could be full depth avalanches in a few locations in areas of very steep terrain above 800 metres.
