

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Friday 16/12/2011

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snowpack will continue to stabilise and will generally be well bonded and stable on all aspects. In isolated areas mainly above 975 metres on steep, sheltered, North-East to South-East aspects the snowpack will be moderately well bonded. The avalanche hazard will be Moderate

Forecast Weather Influences

Overnight, winds will be Southerly and light, becoming Northerly in the day with a freezing level at 500 metres. No precipitation is expected.

Comments

Good climbing and walking conditions - nice to have a calm day for a change.
