

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Sunday 25/12/2011

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snowpack will continue to thaw at all levels. In general the snowpack will remain well bonded and stable on all aspects and altitudes. Any remaining cornices will be prone to collapse. The avalanche hazard will be Low.

Forecast Weather Influences

Mild conditions are expected as the freezing level continues to rise well above the summits. There will be light rain mainly during the day on strong South-Westerly winds.

Comments

When you write your last minute wish list to "Santa" please ask for some more snow!
