

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Thursday 05/01/2012

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Weakly bonded windslab will continue to build mainly on steep North-East through East to South-East aspects above 800m. Cornices will grow and become weak over very steep lee slopes. Older wet windslab at lower elevations and on other aspects will show some early consolidation in cooler temperatures. The avalanche hazard will be Considerable

Forecast Weather Influences

Snow showers throughout and becoming colder with West-North-West, later North-West winds.

Comments

Utterly minging day at Meggie on Wednesday with very few venturing beyond the car park.
