

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Saturday 07/01/2012

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Dry, colder conditions will help stabilise the snowpack in all locations and at all altitudes. Localised accumulations of moderately bonded snow will persist in a few steep, very sheltered areas on North-East through East to South-East aspects above 900m. The avalanche hazard will be Moderate

Forecast Weather Influences

No precipitation is forecast. It will become colder with much stronger North-West winds.

Comments

Precipitation amounts not certain. Check weather reports for updates.
