

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Tuesday 24/01/2012

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Areas of windslab will become increasingly unstable as they are subject to thaw conditions. In steeper locations mainly on Northerly through Easterly to Southerly aspects above 750 metres avalanches are likely. The avalanche hazard will be Considerable.

Forecast Weather Influences

There will be occasional mainly light snow showers during the morning which will turn to rain as the freezing level rises to above the summits and the West winds change to South-Westerly.

Comments

Rising temps due around late morning.
