

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Thursday 16/02/2012

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snowpack will thaw at all levels but remain generally well bonded and stable in all locations. Any new accumulations of sleet will be insignificant and at the highest altitudes. Remaining cornices will be unstable and prone to collapse. The avalanche hazard will be Low.

Forecast Weather Influences

Overnight rain is expected at all altitudes on strong Westerly winds. As the freezing level falls from 1400 to 1000 metres during the day light rain and possibly sleet will die out by the afternoon.

Comments

Drier colder weather from the North by Thursday afternoon.Potential for rockfall in the mild conditions!
