

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Thursday 23/02/2012

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The thaw continues and the remaining snowpack will continue to diminish in extent. Some instabilities will remain in the steepest locations on mainly East to South-Easterly aspects above 950 metres. Elsewhere the snowpack is generally compact and well bonded. The avalanche hazard will be Moderate

Forecast Weather Influences

Winds will remain very strong South-Westerly with a freezing level well above the summits throughout the forecast period. Some rain overnight, drier in the day.

Comments

Staying mild but cold for a time at end of week.
