

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Sunday 26/02/2012

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snowpack will remain moist but stable in most locations. A little thin moist windslab is possible on a few isolated East to South-East aspects above 1000 metres but this will be localised and easy to avoid. The avalanche hazard will be Moderate

Forecast Weather Influences

Some light snow overnight then much milder with light rain. Winds will be mainly strong Westerly but will strengthen later.

Comments

Weather outlook mild and damp for the next few days.
