

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Monday 27/02/2012

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snowpack will continue to thaw at all levels. Wet snow instabilities will be present in the snowpack, mainly on steep North through East to South-East aspects above 950 metres. The snowpack on other aspects will generally be stable. Cornices will be unstable and prone to collapse. The avalanche hazard will be Moderate.

Forecast Weather Influences

Heavy rain is expected at all levels, with strong West-South-Westerly winds.

Comments

Rock and ice fall are hazards in these thawing conditions.
