

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Thursday 01/03/2012

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Stability will remain good in most locations. A little thin humid drifted snow may form on some East to South-East aspects above 1050m but amounts will be small and localised. The avalanche hazard will be Moderate

Forecast Weather Influences

Dry overnight then some rain followed by a little late sleety snow over summits. Winds will be light to moderate South-West then West, later North-Westerly.

Comments

Looking colder for a time into next week.
