

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 17/03/2012

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The already stable spring snowpack will further consolidate in the cooler conditions. Stability will be good. Any fresh accumulations will not be significant. The avalanche hazard will be Low.

Forecast Weather Influences

After a little light rain during the early part of the night, it is expected to be generally dry. It will be colder than of late with the freezing level dropping to about 900 metres. There may be the odd very light snow shower.

Comments

A pleasant day expected on Saturday.
