

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Saturday 08/12/2012

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Unstable snow will be present on most aspects. Greatest accumulations will be on North through East to South aspects above 800 metres, where avalanches are likely. The avalanche hazard will be Considerable

Forecast Weather Influences

It is expected to be dry overnight until a short period of snow at higher levels arrives before dawn on strong and strengthening Westerly backing South-Westerly winds. During the morning precipitation turns to rain at all levels as the freezing level rises above the summits.

Comments

Deep snow on many aspects make walking hard work.
