

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Sunday 09/12/2012

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The existing snowpack will re-freeze and consolidate. However, fresh areas of unstable windslab will be deposited mainly on North-East through East to South aspects above 800 metres. These areas are not expected to be extensive. The avalanche hazard will be Moderate.

Forecast Weather Influences

Overnight the freezing level will drop to around 750 metres where it will remain through the day. There will be some snow showers. Strong winds from the West will veer overnight to the North-West.

Comments

Soft snow making for hard going on foot at higher levels.
