

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Saturday 02/03/2013

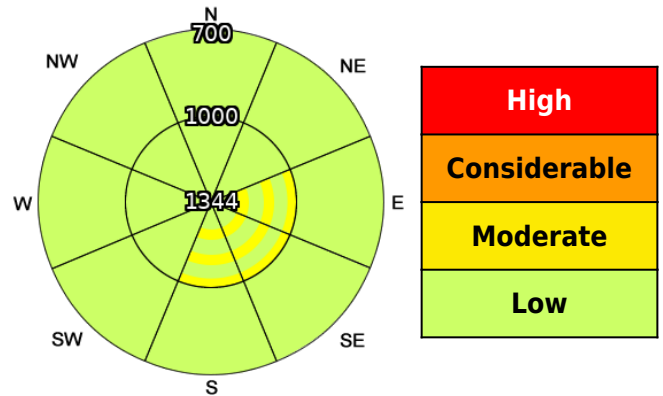

Avalanche Problems

Persistent Weak Layers

Forecast Snow Stability & Avalanche Hazard

The existing snowpack will remain frozen and stable. Some fresh snow accumulations are possible mainly on steep East to South aspects above 1000 metres. Stability will remain generally good although localised instabilities will be present in any significant new snow accumulations. The avalanche hazard will be Moderate.

Forecast Weather Influences

It will remain cold with some light snow showers on light to Moderate North-West winds.
