

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 02/03/2013

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Although the surface of the snowpack will soften slightly with the milder temperatures, the snowpack will remain stable and well bonded. Any fresh deposits will not be significant. The avalanche hazard will be Low.

Forecast Weather Influences

It will remain generally dry, but with the risk of a few light snow flurries through the day. The freezing level will be just above the tops. Moderate winds will be from the North-West.

Comments

Cloudier conditions than of late expected on Saturday.
