

## THE AVALANCHE HAZARD WILL BE CONSIDERABLE

### Avalanche Hazard Forecast for Saturday 23/03/2013

#### Avalanche Problems

#### Forecast Snow Stability & Avalanche Hazard

Good stability on all heavily scoured East to South-East aspects. Drifting will maintain the build up of deep, poorly stabilised windslab mainly on South-West through West to North-East aspects above 850m where avalanches are likely. Other aspects may be affected by cross-loading. Weak cornices will overhang many of these locations. The avalanche hazard will be Considerable.

#### Forecast Weather Influences

No precipitation is forecast. Very strong South-East winds with storm force gusts and becoming colder.

#### Comments

Saturdays weather looking worse!
