

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Monday 01/04/2013

Avalanche Problems

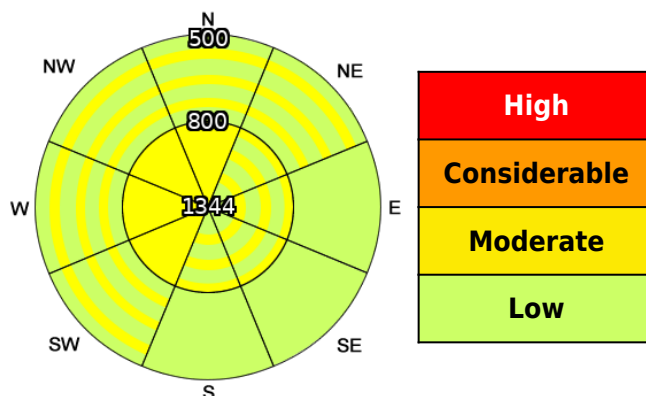

Persistent Weak Layers

New Snow

Forecast Snow Stability & Avalanche Hazard

Little change is expected in the snowpack. Areas of moderately bonded windslab will persist on South-West through West to North aspects above 800 metres. Some localised patches will be present on other aspects. The avalanche hazard will be Moderate.

Forecast Weather Influences

It will remain dry. Light Southerly winds will back to the South-East and strengthen slightly. The freezing level will be around 350 metres.

Comments

Plenty of people out enjoying the hills. However, with a good range of climbing/walking/skiing options no one place was particularly busy.
