

### THE AVALANCHE HAZARD WILL BE CONSIDERABLE

#### Avalanche Hazard Forecast for Saturday 21/12/2013

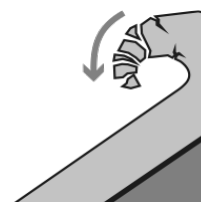

##### Avalanche Problems

Wind Slab

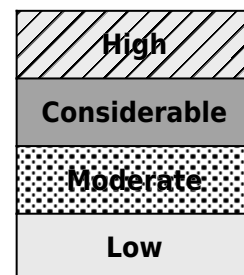

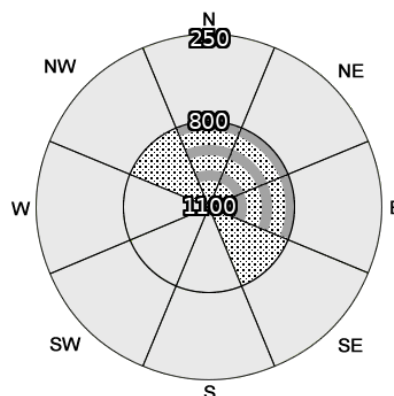

Wet Snow

Cornices

##### Forecast Snow Stability & Avalanche Hazard

A period of very poor stability overnight as snow turns to rain at all levels. Progressively cooler conditions and snow showers during the day will lead to the build up of localised accumulations of moderately bonded windslab on North to East aspects above 800m. The avalanche hazard will be Considerable

##### Forecast Weather Influences

Very mild for a time overnight with rain at all levels. Snow showers expected during the day as temperatures drop. Winds will be moderate to strong South Westerly.

##### Comments

Very poor stability with avalanches likely overnight as snow turns rapidly to rain.
