

THE AVALANCHE HAZARD WILL BE MODERATE**Avalanche Hazard Forecast for Thursday 13/03/2014****Avalanche Problems****Wet Snow****Cornices****Forecast Snow Stability & Avalanche Hazard**

The snowpack will thaw at all levels but mostly it will remain generally well bonded and stable. Localised areas of moderately bonded snow will be found on steep terrain such as gully exits, scarp slopes and corrie rims mainly on North-West through North to North-East aspects above 900 metres. Cornices will be prone to collapse and will potentially trigger slopes below. The avalanche hazard will be Moderate.

**Forecast Weather Influences**

It will remain dry with the freezing level well over the summits. The winds will be strong from the West-South-West and West.

Comments

Thawing at all levels again, but with no rain it shouldn't be too severe. Cornices prone to sudden collapse.
