

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Saturday 15/03/2014

Avalanche Problems

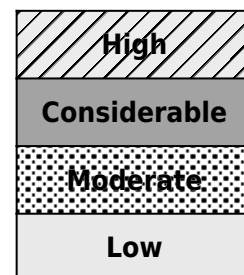

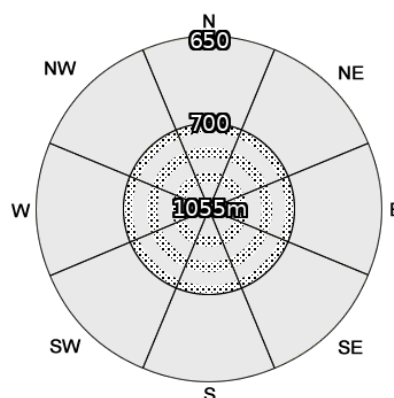

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

Some initial consolidation will take place in the snowpack as temperatures cool, this will soften in the day as temperatures rise but will remain generally stable. Some surface instabilities will be possible on all very steep slopes. Cornices will be prone to collapse and may travel long distances to corrie floors. The avalanche hazard will be Moderate

Forecast Weather Influences

Winds will be very strong Westerly throughout the forecast period. Precipitation will fall as light snow and sleet overnight above 700 metres, then persistent rain at all levels during the day. The freezing level will be above summits during the day.

Comments

A wet day, rain and strong winds continue
