

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Wednesday 19/03/2014

Avalanche Problems

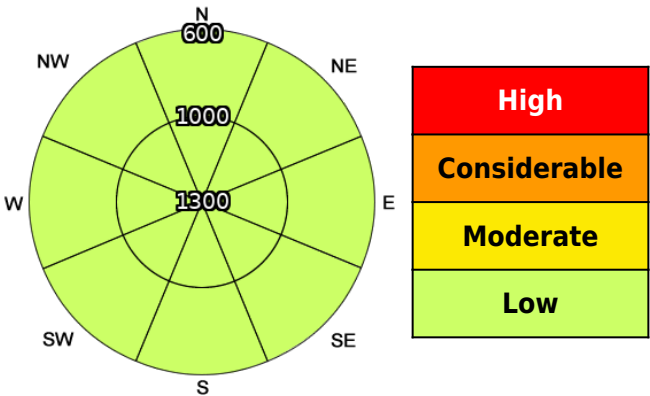

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

The moist snowpack will firm up in the cooler overnight temperatures and will generally be well bonded and stable in all areas and on all aspects. The snowpack will soften during the day and some surface instabilities on the steepest slopes are possible. Cornices remain a significant hazard and will be prone to collapse. The avalanche hazard will be Low

Forecast Weather Influences

Very strong South-Westerly winds are expected throughout the forecast period. Precipitation will be light showers falling as rain at all levels, with some sleet possible on the tops.

Comments

Remaining mild with very strong storm force winds.
